

Multiple Myeloma Ireland Educational Grant 2018

Overview

Multiple Myeloma Ireland (MMI) is the only registered charity in Ireland dedicated to providing support and education for those living with a diagnosis of myeloma. We are delighted to be offering this opportunity to individuals working in haematology. This grant was made possible through the kind donations from MMI fundraisers and the estate of Bartholomew O'Leary.

MMI wishes to fund **two** health care professionals or scientists. The grant must be used to further the applicant's knowledge and expertise in the field of myeloma, for instance, to fund a research study on myeloma, or fund an extension to a current research study on myeloma or an immersion experience in an international centre of excellence for myeloma.

Successful applicants will be required to disseminate their study findings at the annual Multiple Myeloma Information day and at the Haematology Association of Ireland annual conference. The successful applicant may also be interviewed by a medical writer commissioned by Multiple Myeloma Ireland.

Objectives of the grant

To enable early career stage clinicians or scientists with research experience to further their research or clinical skills in the field of myeloma.

The applicant

- The applicant will be a health care professional with a minimum of three years' post registration experience and currently working in a haematology setting.

Funding

- Two grants for the amount is €10,000 will be awarded. The grants must spent within 18 months of the award.

How to apply

- All applicant should complete the application form and forward to Mary Kelly RANP Haematology at maryb.kelly@hse.ie by September 7th 2018.

Review process

Each application will be independently reviewed by Prof Curly Morris. The review process will be guided by the matrix below.
